Specialty care for
urologic health.

Samaritan Urology

 **Samaritan**
Community-owned since 1947

Complete care for urinary tract and men's reproductive health.

Comprehensive urology services.

Samaritan provides comprehensive specialty care for urologic diseases and conditions affecting urinary tract and men's reproductive health.

In addition to providing diagnosis and treatment, our Urology department offers preventive-care procedures and disease management.

Expert care.

Our experienced urologist, Dr. Trisha Kruger, diagnoses and treats conditions that affect the kidneys, ureters, bladder, urethra, and male reproductive organs. She provides surgical and nonsurgical treatment options for bladder and kidney stones, erectile dysfunction, incontinence, urological cancers, prostate health, and other concerns.

Chris Lewis works closely with Dr. Kruger to create individualized treatment plans and comprehensive care.

Education and training.

Dr. Kruger earned her Doctor of Medicine from Loma Linda University Medical Center in Loma Linda, California. She completed her Urology residency at Milton S. Hershey Medical Center at Penn State University in Hershey, Pennsylvania.

Chris Lewis, ARNP, MSN, MHSc, FNP-BC, has years of experience including internal medicine, family medicine, diabetes management/care, and more. He earned his Master of Science in nursing at Gonzaga University, Spokane, and his Master of Health Science at Nova Southeastern University, Fort Lauderdale, Florida.

Preventive care and disease management.

Our Urology department helps patients learn how to prevent and manage their conditions through lifestyle changes, physical therapy, medication, or surgery.

Specializing in the prevention and management of urinary stones, Dr. Kruger offers in-depth treatment using laser lithotripsy and ureteroscopy, extracorporeal shockwave lithotripsy (ESWL), and percutaneous management of more complex and larger stones.

Special practice interests:

- Urinary stones
- Urinary incontinence and overactive bladder
- Bladder/urinary problems
- Erectile dysfunction
- Enlarged prostate
- Prostate cancer
- Testicular cancer
- Bladder cancer
- Hematuria (blood in urine)
- Vasectomy

Specialty care, close to home.

If you suffer from a urologic health condition, you don't have to go far for answers, options, and relief. Leading treatments and expert care are available right here in Moses Lake.

To schedule an appointment, call (509) 793-9770.

Our Providers

Trisha Kruger, MD

Dr. Kruger provides complete care for urologic health, including men's and women's urinary tract concerns and men's reproductive health, such as erectile dysfunction and incontinence. She diagnoses and treats conditions that affect the kidneys, ureters, bladder, urethra, and male reproductive organs.

"With urology there isn't always one right answer. There can be many different treatment options, from dietary changes or medication, to physical therapy or a surgical procedure." —Dr. Trisha Kruger

Chris Lewis, ARNP, MSN, MHSc, FNP-BC

Chris works closely with Urology physician Dr. Trisha Kruger to create individualized treatment plans and comprehensive care, including specialty care for men's and women's urinary tract concerns and men's reproductive health.

"Whether seeing a patient in the clinic or at their bedside, we are able to understand them more deeply as we work together to manage their health concerns." —Chris Lewis
